

Piscataquis Amateur Radio Club

Secretary's Report for the September 28th, 2021 Meeting

In attendance were: (On Video:) WA1REQ-Mike, K1DAE-Debbie E., W1KMC-Kevin, KB1WEA-Bill

GUESTS: Dr David McDermott from Northern Light Mayo Hospital in Dover-Foxcroft

Piscataquis Amateur Radio Club vice-president Kevin Carman (W1KMC) convened the meeting at 7:00 pm.

Due to the guest speaker and only 4 members, club business was not conducted this month.

PRESENTATION:

Dr. McDermott brought the club up to date on Covid vaccines. According to him, the Moderna is not new, having been researched over the last 10 years.

FDA approval has been granted for the Pfizer vaccine. However, Pfizer is the one that does require the third booster.

Moderna is currently seeking FDA approval. Moderna has a longer time for immunity, so may not require the booster.

Johnson & Johnson, the 'one and done', will require the second booster to bring the immunity level of protection derived from the Pfizer and Moderna vaccines.

If anyone has any questions, or would like Dr. MacDermott to speak to your group, please contact him at dmacdermott@northernlight.org.

This concluded the presentation. This is what the club phone number is for. If someone wanted to contact the club to do a presentation or attend our meetings, it gives them a real person to talk to.

Acknowledgements: Thanks to Dr. McDermott for joining us tonight.

Next Meeting will be October 26th, 2021 at 19:00 (7:00pm) on Video, link to room on K1PQ.COM.

Respectfully submitted by K1DAE Debbie Ellis – Secretary.
